METALS MACHINERY
Primetals Technologies continues to pioneer new solutions to provide metals producers with highly tailored, cutting-edge plant equipment.

TURBOCHARGER
MHI Group provides automotive manufacturers with high-quality turbochargers based on our technical competence cultivated over many years. We've also put in place a comprehensive system including after-sales services.

MATERIALS HANDLING
Logisnext provides customers with state-of-the-art forklifts, warehouse equipment and logistics solutions that contribute to the evolution of manufacturing. Automated guided vehicles also form a part of our portfolio.

THERMAL SOLUTIONS
MHI Group provides energy-efficient solutions for cooling and heating in residential, commercial and industrial settings as well as for the automotive and transport sectors.

CONVENTIONAL POWER GENERATION
Mitsubishi Powers state-of-the-art gas turbines offer the world's highest power generation efficiency at 64% or more. We are also participating in an ambitious project to convert a gas-fired power plant in the Netherlands to run on hydrogen.

RENEWABLE ENERGY
MHI Vestas Offshore Wind is focused on the design, manufacturing, installation and service of wind turbines for the offshore wind industry.
